Use real-time effects. All in One Voice Changer by Alth-Tek is software that allows you to change the sound during a call. This has many applications for content creators or for all-in-one voice pranks. It's an easy way to adjust your sound and overall there's a novelty that will make the sound of sounds different using the software. What is the main feature of All-in-One Voice Changer? It lets you test the sound before you answer the call to listen to what you look like one can. Import audio or audio so that volume changes and audio files can be recorded in Wav format, the program can be associated with Skype and can be made using changed audio. The interface is quite basic with a singular slider that allows you to go up and down the field. To identify the graphics of men, women, cats and dragons help navigate the field, one just needs to move the slider to test the pitch they want to change the sound. What is the voice changer? The only change a user can make using the all-in-one changer is the pitch. There is no other aspect of the sound that can be changed. However, even changing the pitch can change the sound dramatically, and it becomes totally unknown. For character performances or content creation, this can be a great tool to help play different characters. Therefore, using the program, it is not like you will immediately sound like a dog or a cat. But you can sound like a man or a woman with a different treble. Prank friends just get easy! To make a voice dial with an all-in-one voice changer. The program can be integrated with Skype to make calls using changed voice, one just needs to have a Skype account, and the software will automatically sync with it. There are some options for All-in-One Voice Changer by Alth-Tek: Voxal Voice Changer, Skype Voice Changer Pro, Fake Voice Changer, AV Voice Changer, MorphVox, and more. Programs like Voxal Voice Changer can help change audio by pitch, echo flange, and other Skype Voice Changer Pro is completely integrated into Skype programs and does not require external programs such as All-in-One Voice Changer to change the sound. However, it is only available in pro/business version programs and is not free. Other programs such as MorphVox, AV Voice Changer and others also have many unique features and functions missing from this Alth-Tek voice changer software. What are the dangers of an all-in-one changer? The biggest risk of voice change software is that it can be misused by someone to be badly intentional. While usage can be multiple times in content creation, there are many ways that changing sounds can be misused. This may be why All-in-One Voice Changer does not allow users to export files to play back during a call or while using Skype software. Allow call recording, but that's the functionality of other programs. What is the last word about the All-in-One Voice Changer by Alth-Tek? This application is a simple and fun way to change someone's voice for a prank call, someone creates different characters using different sounds, try singing with different sounds, or just have one with friends by making a harmless prank. However, if misuse can be risky and can be used for illegal activities, it is best to use the app judgmentally and for fun! It is an interesting audio application which can play online prank calls with your friends. When you talk to your friends through IM tools such as Skype, Yahoo Messenger or QQ International, it can change your volume in a funny way during a call. You can also use a dubbed tool to extinguish funny videos your way. It can also be used for dubbing funny videos with import/export functions. Supports many popular phone web applications such as Skype, QQ International and Yahoo Messenger All-in-One Voice Changer based on the Skype voice changer of AthTek software, so they have the same interface. Those who want to prank call a friend will love this software. When you're talking to your friends through the IM tool, you can change your volume in a funny way during a call. Free Trial1.63 MB Download voice changer for voice chat rooms and PC connections to your phone, ideal for Internet users. Change the sound in real time, high quality and natural sound output into the sounds of others (babies, girls, boys, old men, old women, robots... sounds) by adjusting the volume and timbre levels, making your voice deeper or thinner, male or female, you can have a changed sound output with top secret, safe and funny. AV VCS 3.0 audio changer software with DirectX support is a special application for voice chat rooms (AOL Instant Messenger (AIM), Yahoo! Messenger (YIM), MSN Messenger, ICQ, Falaik, Odigo, Trillian, NetMeeting...), voice-enabled instant messaging programs, voice email applications, online voice games (together with Roger Wilco, Microsoft Game Voice...), audio video conferencing and PC-to-Telephone programs (Net2Phone, Dialpad, Go2Call, DeltaThree, MaxPhone...) include media players.
